PROFESSIONAL SUMMARY

Motivated Computer Information Systems graduate student with strong technical and analytical skills and experience in software development projects, system design concepts, and problem-solving. Knowledge of software development lifecycle (SDLC), object-oriented programming, databases, and testing methodologies. Skilled in designing scalable solutions, debugging applications, and collaborating in team environments. Strong understanding of coding best practices, documentation, and quality assurance processes. Experience working on IoT-based applications and business systems projects. Quick learner with a strong interest in software engineering, application development, and modern technology environments. Passionate about developing efficient, reliable, and high-quality software solutions.

TECHNICAL SKILLS

Programming & Concepts: Java, Python, SQL, Object-Oriented Programming, Data Structures, Algorithms
Tools & Technologies: Git, Excel, SAP GUI, ERP Systems, Testing & Debugging
Development: SDLC, Unit Testing, Integration Testing, System Design, Documentation, Problem Solving

SOFTWARE ENGINEERING EXPERIENCE & RESPONSIBILITIES

• Developed and maintained software components based on project requirements and technical specifications.
• Wrote clean, scalable, and efficient code following software engineering standards and coding practices.
• Participated in application design discussions and contributed to solution architecture decisions.
• Identified, analyzed, and resolved defects to improve software performance and reliability.
• Collaborated with cross-functional teams to understand requirements and deliver project goals.
• Conducted testing and validation activities to ensure system quality and functionality.
• Documented technical requirements, implementation details, and project outcomes.
• Supported deployment activities and contributed to continuous improvement efforts.

PROJECTS

SMART START – IoT Security System (Team Lead)
• Led development of an IoT-based vehicle security system with authentication-enabled ignition control.
• Integrated sensors and implemented safety mechanisms for secure operations.
• Performed testing, debugging, and system validation to improve performance and reliability.

Business Acquisition Case Study – Supply Chain & Operations Analysis
• Analyzed business systems and operational workflows to identify process improvements.
• Delivered data-driven recommendations and documented findings for stakeholders.

EDUCATION

M.S. Computer Information Systems – Rivier University | GPA: 3.79/4.0
B.Tech Computer Science & Engineering – KITS, Guntur | CGPA: 7.2/10
